**GEMÜ®**

# Diaphragm Valve, Metal

## Construction

The GEMÜ 625 2/2-way diaphragm valve has a low maintenance piston actuator which can be controlled by inert gases. Normally Closed, Normally Open and Double Acting control functions are available. An optical position indicator is integrated as standard.

## Features

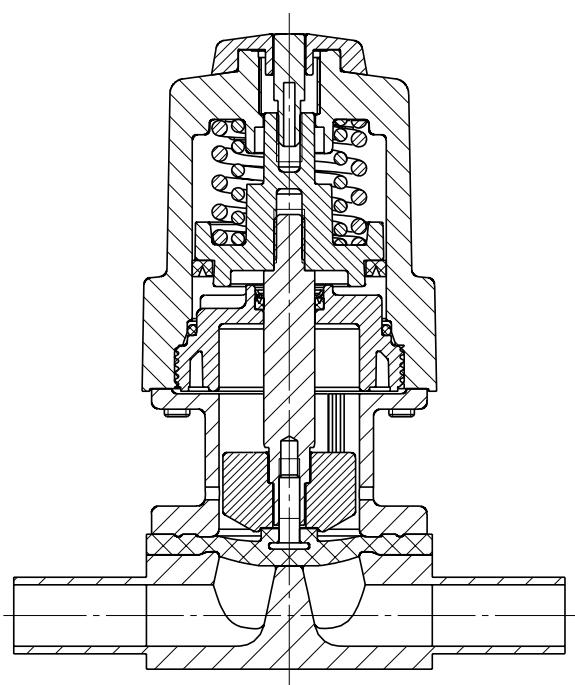

- Suitable for inert and corrosive\* liquid and gaseous media
- Insensitive to particulate media
- Valve body and diaphragm available in various materials and designs
- Compact design (ideal when space is at a premium)
- CIP/SIP cleaning and sterilizing capabilities
- Versions according to ATEX on request

## Advantages

- Hermetic separation between medium and actuator
- For sterile applications
- Optional flow direction
- Installation for an optimized draining is possible
- Optional accessories:
  - Stroke limiter
  - Electrical position indicators with microswitches or proximity switches

\*see information on working medium on page 2

## Sectional drawing

**GEMÜ® 625**

## Technical data

### Working medium

Corrosive, inert, gaseous and liquid media which have no negative impact on the physical and chemical properties of the body and diaphragm material.

### Temperatures

#### Media temperature

FPM (Code 4)	-10 ... 90 °C
EPDM (Code 13)	-10 ... 100 °C
EPDM (Code 17)	-10 ... 100 °C
PTFE (Code 52)	-10 ... 100 °C

#### Sterilisation temperature <sup>(1)</sup>

FPM (Code 4)	not applicable
EPDM (Code 13)	max. 150 °C <sup>(2)</sup> , max. 60 min per cycle
EPDM (Code 17)	max. 150 °C <sup>(2)</sup> , max. 180 min per cycle
PTFE (Code 52)	max. 150 °C <sup>(2)</sup> , no time limit per cycle

<sup>1</sup> The sterilisation temperature is valid for steam (saturated steam) or superheated water.

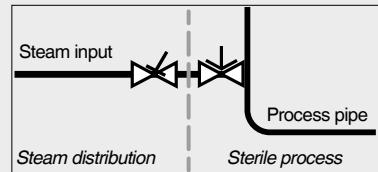

<sup>2</sup> If the sterilisation temperatures listed above are applied to the EPDM diaphragms for longer periods of time, the service life of the diaphragms will be reduced. In these cases, maintenance cycles must be adapted accordingly. This also applies to PTFE diaphragms exposed to high temperature fluctuations.

PTFE diaphragms can also be used as moisture barriers; however, this will reduce their service life.

The maintenance cycles must be adapted accordingly.

GEMÜ 555 and 505 globe valves are particularly suitable for use in the area of steam generation and distribution.

The following valve arrangement for interfaces between steam pipes and process pipes has proven itself over time: A globe valve for shutting off steam pipes and a diaphragm valve as an interface to the process pipes.

#### Ambient temperature

0 ... 60 °C

### Control medium

#### Inert gases

Max. perm. temperature of control medium	40 °C
Filling volume	0.02 dm <sup>3</sup>

		Operating pressure [bar]	Control pressure [bar]		
Diaphragm size	DN		Stf. 1	Stf. 2	Stf. 3
10	10 - 20	0 - 6	5 - 7	max. 5.5	max. 5.0

All pressures are gauge pressures. Operating pressure values were determined with static operating pressure applied on one side of a closed valve. Sealing at the valve seat and atmospheric sealing is ensured for the given values.

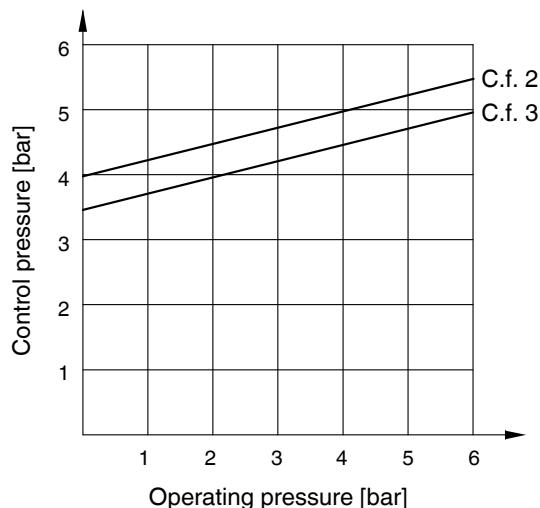

Information on operating pressures applied on both sides and for high purity media on request.

Kv values [m <sup>3</sup> /h]							
Diaphragm size	DN	DIN Code 0	EN 10357 Series B Code 16	EN 10357 Series A Code 17	DIN 11850 Series 3 Code 18	ASME BPE Code 59	ISO 1127 / EN 10357 Series C Code 60
10	10	-	2.4	2.4	2.4	2.2	3.3
	15	3.3	3.8	3.8	3.8	2.2	4.0
	20	-	-	-	-	3.8	-

Kv values determined acc. to DIN EN 60534, inlet pressure 5 bar,  $\Delta p$  1 bar, stainless steel valve body and soft elastomer diaphragm.

The Kv values for other product configurations (e.g. other diaphragm or body materials) may differ. In general, all diaphragms are subject to the influences of pressure, temperature, the process and their tightening torques. Therefore the Kv values may exceed the tolerance limits of the standard.

## Control pressure / operating pressure diagram

The control pressure depending on the prevailing operating pressure, as shown in the diagram, is intended as a guide for operating the system with low wear on the diaphragm.
